

## **Solutions Center: Perishable Freight**

As we wrap up the busy fourth quarter, thousands of perishable freight loads will have gone through JTS nationwide. Perishable loads can be moved by any number of transportation modes such as Full Truckload, LTL, Rail Intermodal, Air and Ocean freight with the best negotiated carrier rates possible to maximize your profitability. We offer complete solutions to meet the needs of the fresh and frozen commodities market.

Fruits and vegetables, produce, cheese, fresh and frozen hot dogs, hamburgers and seafood are just some of the perishable commodities we handle daily, delivering highly personalized, hands-on with every load we manage for you with 24/7, reliable service and quick responsiveness to your issues.

Our commitment to providing the highest level of service is what makes JTS unique in the world of 3PLs. For example, to ensure only the most qualified carriers are moving your freight, our Carrier Relations team verifies operating authority and carrier insurance, checks safety ratings and references and tracks fraudulent activities on a daily basis for your total peace of mind.

Our knowledgeable team will help protect your perishable shipments and simplify the shipping process with every load you entrust to us, by monitoring all pickups, conveying loading instructions, and maintaining communication with carriers to confirm that on-time performance standards are met. We support and enforce your seal policies, making sure your deliveries are done safely from start to finish.

JTS facilitates online management and instant visibility into all perishable freight deliveries with our cloud-based TMS, FreightOptixx™, which allows all our customers to optimize freight orders, track shipments, get instant rate quotes, consolidate shipments, run analytics reports, manage shipping documents and view invoices for Truckload, LTL, Rail Intermodal and International shipments.

No matter what your perishable requirements are, you can trust JTS to give you the highest level of service possible in the industry.
