

INTERMODAL SOLUTIONS

We keep your freight moving on the right track.

When shipping finished goods or raw material around the country, turn to JTS for extensive, flexible transportation solutions. JTS has strategic alliances with the most credible intermodal, rail, ocean and drayage companies in the nation and is a member of the Intermodal Association of North America (IANA).

Intermodal freight transportation involves loading freight in a secure container and moving it via truck and rail.

This method has many benefits, including:

- reduced handling
- more security
- less risk of damage with today's rides smoother than ever
- potential for savings compared to traditional OTR
- fastest unencumbered transit schedules
- transit times are consistent:
 - 7 to 8 days coast-to-coast
 - 4 to 5 days West Coast to Midwest

We offer door-to-door services and access to all major ports, rail ramps and consumer markets in North America, including some points in Canada and Mexico.

JTS partners with numerous transportation providers to utilize tens of thousands of available rail and asset carrier-owned equipment:

- 42,500 pounds or less

- 53-foot dry stacktrain containers nationwide
- 20', 40' and 45' ISO boxes for westbound service only
- Dry containers are mainly used, but temperature-controlled boxes are popular and are available in certain lanes.

Only qualified carriers move your shipments

You can trust that only qualified carriers are moving your freight. Our Carrier Relations team pre-qualifies all carriers before loading:

- Verify operating authority and carrier insurance.
- Check safety ratings and references.

Continuous development and investment in technology

At JTS, the evolution of technology is always moving forward. We make investments to offer the most advanced features possible.

As a value-added benefit of partnering with JTS, we offer our cloud-based TMS, **arriviture**™, to our customers at no cost. The system is powered by MacroPoint®, project 44®, SMC3®, CLOUDFLARE®, Atmosera®, PCMiller®, DAT®, and Microsoft® Azure™.

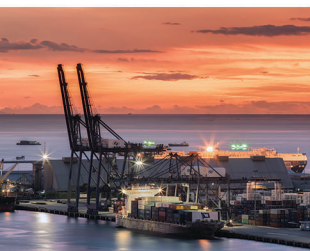

You gain instant access and visibility into your logistics activities any time, any where. Get instant rate quotes, enter new orders, track shipments, consolidate shipments, run analytics reports, manage shipping documents and view invoices.

Service excellence with personal attention

We provide 24/7, friendly, personal attention and respond to your questions and any issues that may arise. Our team will help protect your shipments and simplify the process with every load you entrust to us:

- Monitor all pick-ups, convey loading instructions.
- Maintain contact with carriers to confirm your freight arrives safely and on-time.
- Negotiate the best carrier rates possible to increase your profits.
- Simplified billing, claims filing and processing.
